#1255 The 1st Neuroendovascular Therapy Teleconference 2020.09.28

【Event】
The 1st Neuroendovascular Therapy Teleconference

【Date】2020.09.28

【Venue】
Kyushu University Hospital (Japan), Kagoshima University (Japan), Kagoshima Prefectural Oshima Hospital (Japan), National Cerebral and Cardiovascular Center (Japan), Shoseikai Hachisuga Hospital (Japan)

【Comments】
It is very important to perform reperfusion therapy as soon as possible for acute ischemic stroke (AIS). In this conference, 5 hospitals with different backgrounds discussed about the time metrics (workflow) of treatment for AIS with case presentations. There was a lively debate, which is useful for the daily clinical practice.
