【Comments】
The session was connected 12 centers and ran smoothly. The session was a very fruitful and every participant was actively involved in the discussion. The first topic was the 10 years APAN technical review and followed by remote cardiac sonography diagnosis. The next topic was IOT application for remote health monitoring project. The last topic was video conferencing for engagement of knowledge sharing. In the upcoming APAN Technology session, we will have a live demonstration, which most of participants are interested in.

Mr. Minh, a chief engineer of this session.
