TELEMEDICINE:  
EXPANDING TO THE WORLD

## Greetings from Symposium Chairman

We are very happy to host the 12<sup>th</sup> Asia Telemedicine Symposium (ATS) in conjunction with the 22<sup>nd</sup> Annual Academic Congress of the Japanese Telemedicine and Telecare Association, to be held in Fukuoka from November 9 to 10, 2018. ATS was established for development of medical-engineering collaboration in 2007 when telemedicine is not popular in Japan. We have made great efforts for international telemedicine activity by broadcasting excellent programs with high quality image and sound. Just 10 years have passed since establishment of Telemedicine Development Center of Asia (TEMDEC).

So far, TEMDEC connected 622 institutions in 64 countries, and over 900 teleconferences and live demonstrations were held with fruitful bidirectional discussions. Nowadays, everyone knows that telemedicine can help to learn from experts, share the experiences with participants and improve health status of individuals in each country. Unfortunately, there are still regional differences of diagnosis and therapy in medical field. Therefore, we should keep on working to expand our activities to everywhere in the world. There is no doubt that sharing the knowledges and experiences of international telemedicine with many doctors and engineers through this ATS plays an important role to achieve our goal.

We welcome you all to Fukuoka to find new information, to meet many friends and to expand your activities to various fields and countries.

Looking forward to seeing you in Fukuoka.

*Tomohiko Moriyama*
