I really want to use it.: 5 20 69%

Free style feedback

If you have any ideas about the tool, please describe it.

provide us the ppt and demo video please

May be after we use this software then we may come out with some suggestions.
Right now no comments
how can we apply to have a try?

Most of the time, the Storm on my side was completely synchronized with the one in Kyshu U. (via Vidyo). But sometimes the video on my Storm stopped playing and the timecode is still counting forward, while the one in Vidyo (Kyushu U.) was still playing smoothly. I suspect if it is a problem on the Storm server side? Otherwise it is really an amazing system.

this tool is good, like google drive but more good because can syncron between two device
need to be mobile friendly
it's almost like google docs but in HD video and you have new technolgy to repalce the telepointer Software
So far it seems good
It is not clear whether it is free or not.
very useful
