There are still some difficulties in slide preparation, especially when the presenter was asked to provide new pictures.

Please define the time region when making schedule announcement.

There are few people who have enough time to participate. Twice a month or once a month with 1 presentation might be better to hold.

When we could not get the presentation files in time, it is hard to catch up all the details in limited time.

I have got hang laptop if editing presentation while file was presented, what causes this?
