- I am not a medical doctor: 22%
Will you attend another teleconference session next time?

- I am not a medical doctor: 22%
- Yes: 78%
Feel free to write any comments you may have.

We can't saw the slides in no one lecture. (Clinica Alemana)

We would like present in the next conference: Subepithelial lesión, diagnosis and treatment

Excellent. Very glad to be part of it

I would suggest the speakers to share their presentations within them, in order to avoid the repetition of information

If quality of sounds is improved, it would be nice.

At beginning was little blur and choppy audio, after second presentation quality get normalized and with very good quality

Albeit I was the organizer I got very satisfied with the entire teleconference: Technical settings, sound, image, program and discussion.

In Clinica Alemana the power point was imposible saw these, only we listening the lecture, a big problem this time. I hope would be fine

In the beginning the presentation screen was very small after this the participants screen frozen when the presentation was started
