**Venue**

- Fukuoka International Congress Center (Japan),
- Chulalongkorn University (Thailand),
- Seoul National University Hospital (Korea),
- National Taiwan University (Taiwan)

**Comments**

International teleconference was first organized in JSN history. Epilepsy and involuntary movement were the main themes, where Korea, Taiwan, and Thailand joined. Moving images of patient movement and of electroencephalogram were clearly shown and discussed between these four stations. They were so well impressed with the effectiveness of this remote education that next plan was confirmed by the participants.
