

【Event】
The 6th Remote Lecture for Ritsumeikan Asia Pacific University (APU)

【Date】 2017.01.30

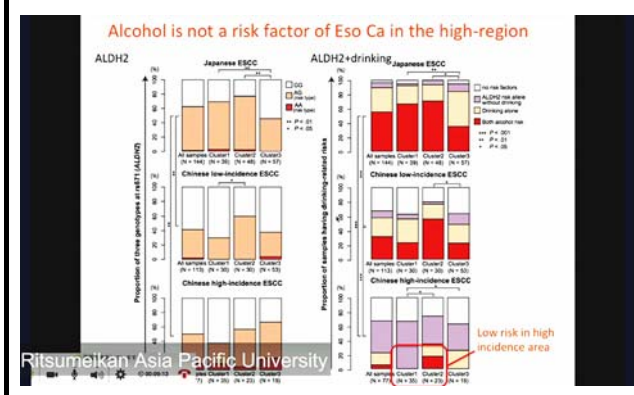

【Venue】
Ritsumeikan Asia Pacific University (Japan),
Kyushu University Hospital (Japan)

【Comments】
Dr. Michael from Taiwan introduced the morbidity of various cancers in Taiwan. We were astonished the high incidence of oral cancers, and he speculated a certain and toxic dietary habit might be a cause of the malignancy. We introduced that the incidence of esophageal cancer is different among urban, rural China and Japan. The difference of SNPs in ALDH and smoking among them may determine the risk for esophageal cancer.

Dr. Mimori (rt.) from Ritsumeikan makes a comment.
