

<p>【Event】 The 65th Kanagawa Fetus Echo Advanced Seminar</p>	<p>【Comments】 2 days' Advanced Seminar aims to enhance fetus diagnosis rate of severe congenital heart disease. 369 participants such as obstetricians, ultrasound technicians, pediatricians and medical personnel, gathered at 22 venues throughout Japan. The seminar uses the inter-university information network "SINET" which connects the main venue, Keio Univ. and 21 remote venues throughout Japan. This seminar has received high acclaim as a solution for bridging the medical gap between urban and provincial areas.</p>
