

<p><b>【Event】</b> The 43rd APAN Meeting - JIPMER</p>	<p><b>【Comments】</b> It was a great learning experience to host our second medical working group session. The session focused on the minimally invasive gastrointestinal surgery and the academic content of high quality from reputed institutes was rated as good to very good by the participants. We had a brief network connectivity issue but the overall technical quality was good, considering those all of video lectures. We thank everyone for kind cooperation and active participation.</p>
<p><b>【Date】</b> 2017.02.13</p>
