

<p><b>【Event】</b> The 43rd APAN Meeting - MIS</p>	<p><b>【Comments】</b> 10 centers joined the MIS session. Two centers were in USA. For this 90 min., 5 interesting cases were presented and discussed by the experts from different centers. The main venue was at India, however the main organizing engineer teams were at Siriraj Hospital, Bangkok, Thailand using H323 system. National Cancer Center (Bangkok, Thailand) teams came to Siriraj Hospital for joining the session. With our engineer teams' preparation, there were minimal technical problems during the session such as not smooth video transmission from centers. Finally, we got a very successful teleconference. I would like to thank all the centers and engineer teams for the contributions and effort to this meeting.</p>
