

<p>【Event】 MIS-ASIA Cluster</p>	<p>【Comments】 Because the session was participated by 4 sites from Costa Rica and Mexico, it became an interesting one, although there were minor drawbacks such as disturbed microphones or slow presentations. The session was delayed due to many presenters (2 doctors and 3 engineers), but everything was fine with exciting presentations and discussion after cooperative technical preparations.</p>
<p>【Date】 2017.02.22</p>	
<p>【Venue】 Kyushu University Hospital (Japan), The National Institute of Medical Sciences and Nutrition (Mexico), National Cancer Institute of Mexico (INCan) (Mexico), University of Costa Rica (Costa Rica)</p>
