The 7th Asia Telemedicine Symposium Report

The 7th Asia Telemedicine Symposium was held on December 13th and 14th in Bangkok, Thailand. This was the first time the symposium was held in Southeast Asia. There were 75 participants from 25 countries, including 55 attending in person and 20 joining remotely. Although there were initial concerns about the recent clashes between anti-government protesters and the police in Thailand, we found that there was no need for concern, and the secretariat of organizing committee in Thailand gave us a warm welcome.

In my view, the purpose of this symposium was to share updated information on knowledge, experiences, and activities from different medical and engineering fields in various countries and to make adaptations based on these updates. It was also important for participants to interact with people in different positions or occupations with similar interests or problems. In addition to the fascinating presentations, the hospital tours and evening receptions at Siriraj Hospital and Chulalongkorn Hospital were attended by many. It was an excellent occasion to get to know one another and to learn about each other’s cultures and backgrounds. The ties formed among the wide range of people in attendance have created tremendous opportunities around the topic of telemedicine.

Last but not least, I would like to express my sincere appreciation to everyone involved in the symposium and especially to the Thai organizers. I hope to see you all again next year in Fukuoka, Japan. (Saho Miyazaki)
