

Telemedicine in Vietnam

Updated information

Cao Duc Minh
Vietnam Research and Education Network

The Ministry of Health

- Improving treatment quality and reducing patient overloading
- Build more satellite hospitals specializing in oncology, trauma- orthopedics, obstetric, pediatric
- During the period between 2012-2015 satellite hospitals will be built in non-urban areas and from 2016-2020, they will be built in big cities
- Program has made some achievements, such as improving the capacity of local hospitals, limiting the number of patients need to transfer to central hospital

VinaREN

- New DVTS quatre system support by Temdec
- New equipment for DVTS
- New cooperation: Korea, Thailand, Singapore

I08 hospital

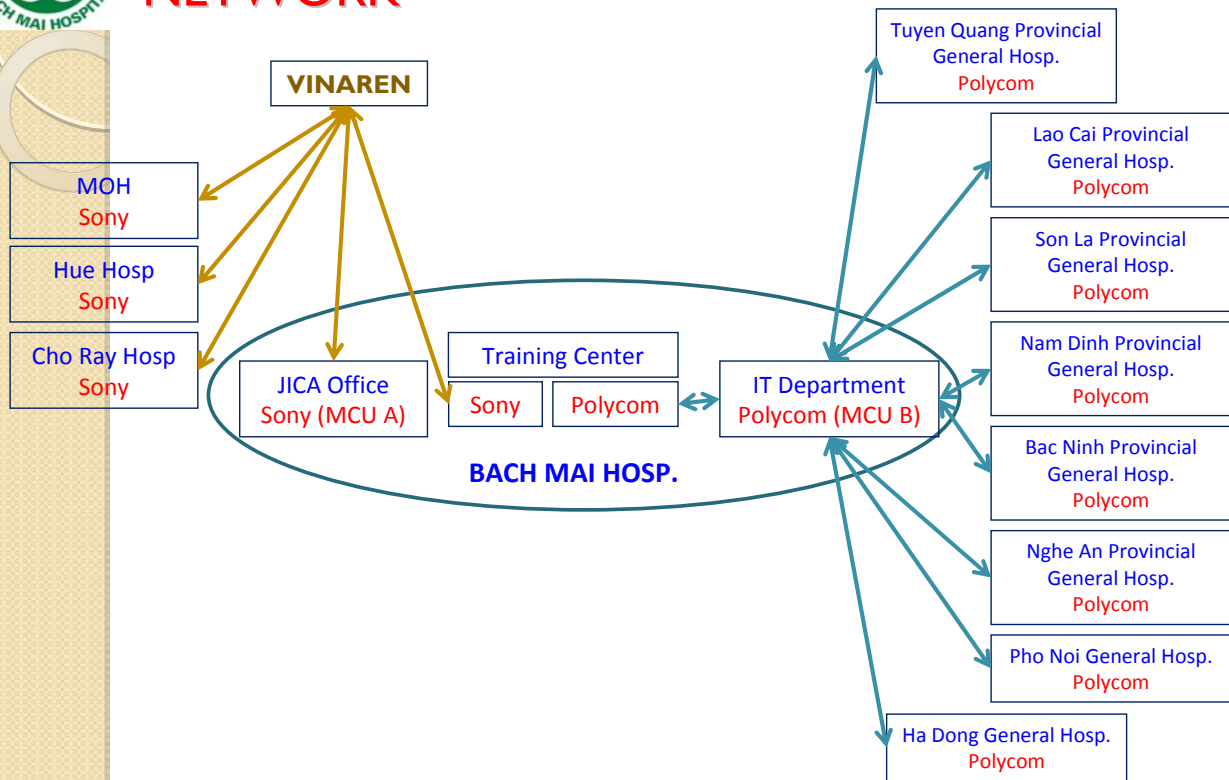

- Monitor system
- Build telemedicine system next year
- Held a successful First national gastrointestinal endoscopy meeting
