 - School of Health Sciences
 - Institute for Research of Molecular Medicine
 - Clinical Research Platform
 - Health Sciences and Biomedical Research Platform
 - Other Departments
- Website: <http://www.kck.usm.my>

video conference Infrastructure

- Hardware based (H.323)
 - Model: Cisco Tandberg
 - End point
 - MCU
 - VCS – gatekeeper
 - TMS
 - 17 locations in the campus
 - Current uses:
 - Distant learning
 - Meetings between campus / external parties
 - Training
- Software based
 - Cisco WebEx
 - Skype for Business (formerly Lync)

 **What I Have Learned From APAN 41**

- Technology is always evolving, need to keep up
- Broaden my mind on the importance and vast use of video conference in medical sector
- Technical test session by engineers are very important and cannot be taken lightly
- APAN and especially Medical Working Group members are very friendly – working together as a group closely and actively

 **Expectation & Future Plan**

- Need to learn more about proper setup and preparation for organizing a successful video conference
- Establish a stable video conference between Malaysia Universities with Teaching Hospitals
- Consider following standard platform/technology for better video conference experience between collaborating universities
- Expand video conference uses in medical field
- Promote University Science of Malaysia active participation in international video conference sessions
- Learn more from TEMDEC team and others

**UNIVERSITI
SAINS
MALAYSIA**

Thank You
