

【 Venue 】

Kyushu University, Ohashi Campus (Japan),  
Kyushu University Hospital (Japan)

【 Comments 】

The first semester presentation of this project was held. A total of seven ideas of prototype designs presented. For surgery, a tool to support introduction of a colostomy and a web service for posting tweets from patients were presented, and for neurology, a tool for patients to make up their own and a tool for organizing tubes and codes for hospitalized patients. All ideas were unique and discussed in depth. We look forward to the second semester.
