<p>Kyushu University Hospital (Japan), Fukuoka Prefectural Support Center for Children with Medical Care (Japan), Tokyo (Japan)</p>	<p>We have held an annual lecture to promote understanding of children's specific chronic diseases toward officers caring for these patients. For the first time, we held this lecture toward the patients and their families as well as the officers, focusing on entering kindergarten/school. The attendees were grateful for experts expressing their thoughts and could know the specialized consulting service through the opinion of experts from the fields of education, administration, and medicine.</p>
