The 61st APAN Meeting -JBNU-S.Korea (Jeonbuk National University)

【 Connecting institutions 】	【 Comments 】
Le Meridien Dhaka (Bangladesh), Kyushu University Hospital (Japan), Jeonbuk National University (Korea, Republic of), University of Rhode Island (United States), Sungkyunkwan University (Korea, Republic of)	The session successfully linked institutions from multiple countries across Asia and North America. This reflects strong utilization of the APAN collaborative network infrastructure and demonstrates the feasibility of real-time intercontinental academic interaction. The session covered diverse but clinically significant biomedical topics across hepatology, metabolic disease, pregnancy-related liver complications, and airway pathology. Presentations demonstrated strong translational relevance connecting molecular mechanisms with therapeutic opportunities. The thematic diversity supported interdisciplinary discussion among participating institutions.
