The 19th Student Lecture

【 Connecting institutions 】	【 Comments 】
Kyushu University Hospital (Japan), University of Queensland (UQ Dutton Park) (Australia)	As a part of the “Introduction to Medical Engineering” course for second-year medical students, we held a short online lecture by an Australian telemedicine researcher. The lecture focused primarily on the Australian healthcare system and the need for telemedicine in that country. We used a voice transcription feature to help students understand English, but unfortunately, the small screen size made it difficult to read the text.
