Control protocol video conference system

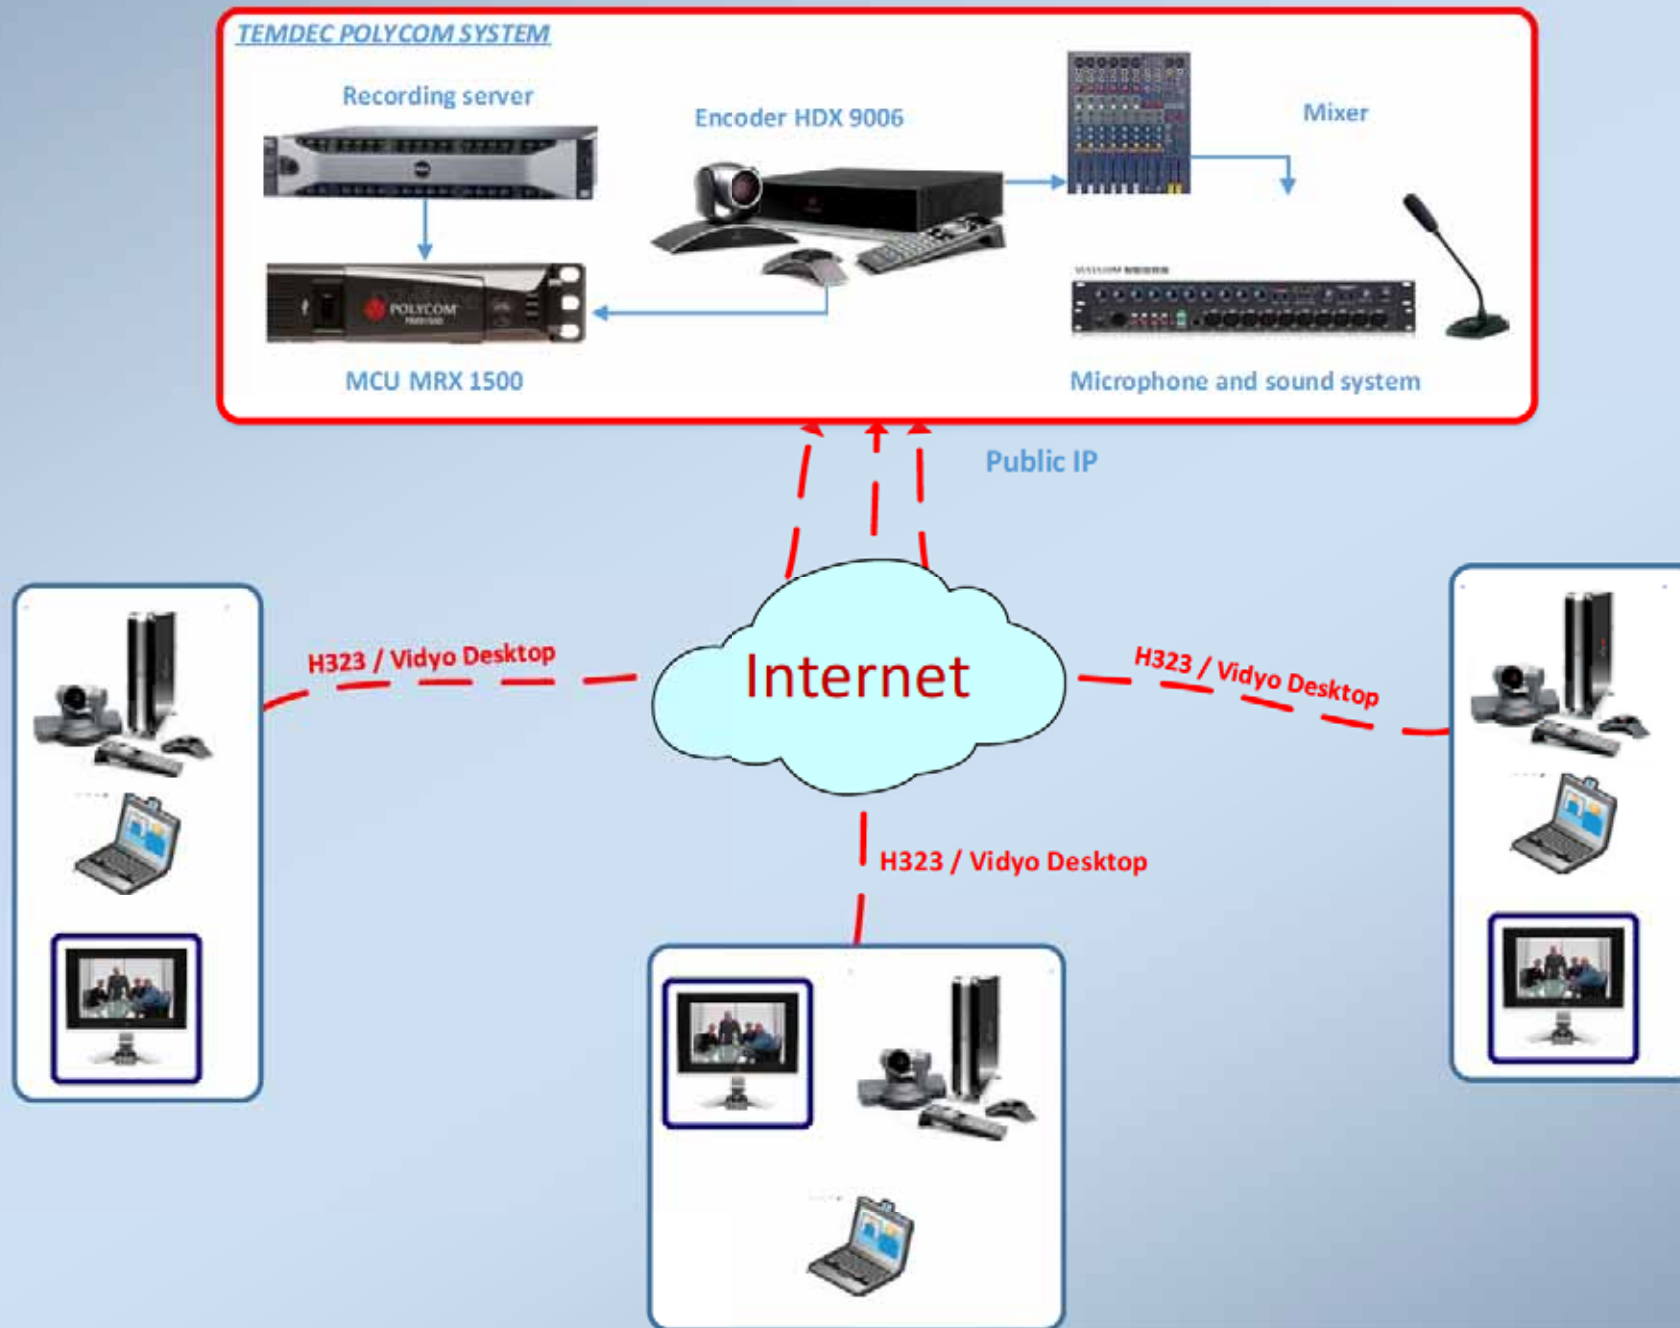

The screenshot displays a video conference interface. On the left, a large video window shows a meeting room with six participants seated around a table. A banner for Kyushu University is visible in the background. On the right, a smaller window displays a table titled 'Intra-operative Details' with the following data:

Parameter	Anterior Group	Posterior Group	P Value
Total time	Equal in both groups		
- Submucosal tunneling	Equal in both groups		
- Myotomy	Equal in both groups		
- Clipping	6.15 ± 4.01	6.46 ± 2.44	0.04
Number of clips required	6.27 ± 1.73	4.97 ± 1.00	0.01

Below the table, the text 'Asian Inst. of Gastroenterology' is visible. The right side of the interface also shows a grid of smaller video thumbnails for other participants.

How the telemedicine event is realized

- Planning for event, technical method, etc.
- Invite participant via Email
- Survey venue before the event
- Division of tasks for the team ...
- Technical check before takes place the conference with participant.
- Mounting, setup all equipment for teleconferences in Venue.
- Received slide and movie from Participant.
- Follow, monitor and troubleshooting in the conference
- Report after finished the event.
- Closing remarks and finish event

Technical preparations

- Send schedules to the participating countries
- Decide venue, date and time, presenters
- Network policy check in venue countries
- Teleconferencing system available ?
- Coordinate with local engineer to test
 - Connection check
 - Image sharing check
 - Sound Check

Technical preparations

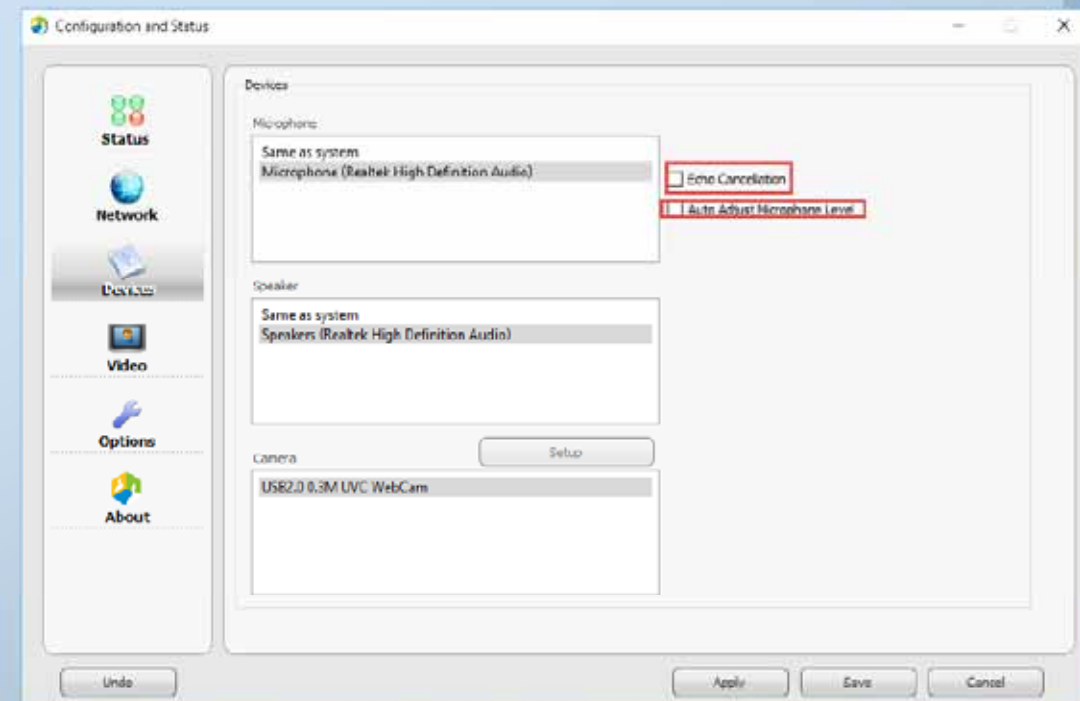

Required quality level for telemedicine

- Minimum bandwidth internet 4 Mbps
- Recommends using the wire network.
- Computer with high resource will give nice the picture and not lag
- Camera can support HD
- Microphone have function noise filtering
- Make sure mute the microphone when not speak
- QoS for conference

Technical Troubleshooting

- Sound problem :
 - Echo / Howling
 - Noise
 - Sound breaking up
- Image Problem
 - Poor image quality
 - Image does not display
 - Presentations are not show on screen
- Network problem
 - Packet loss

Future plan

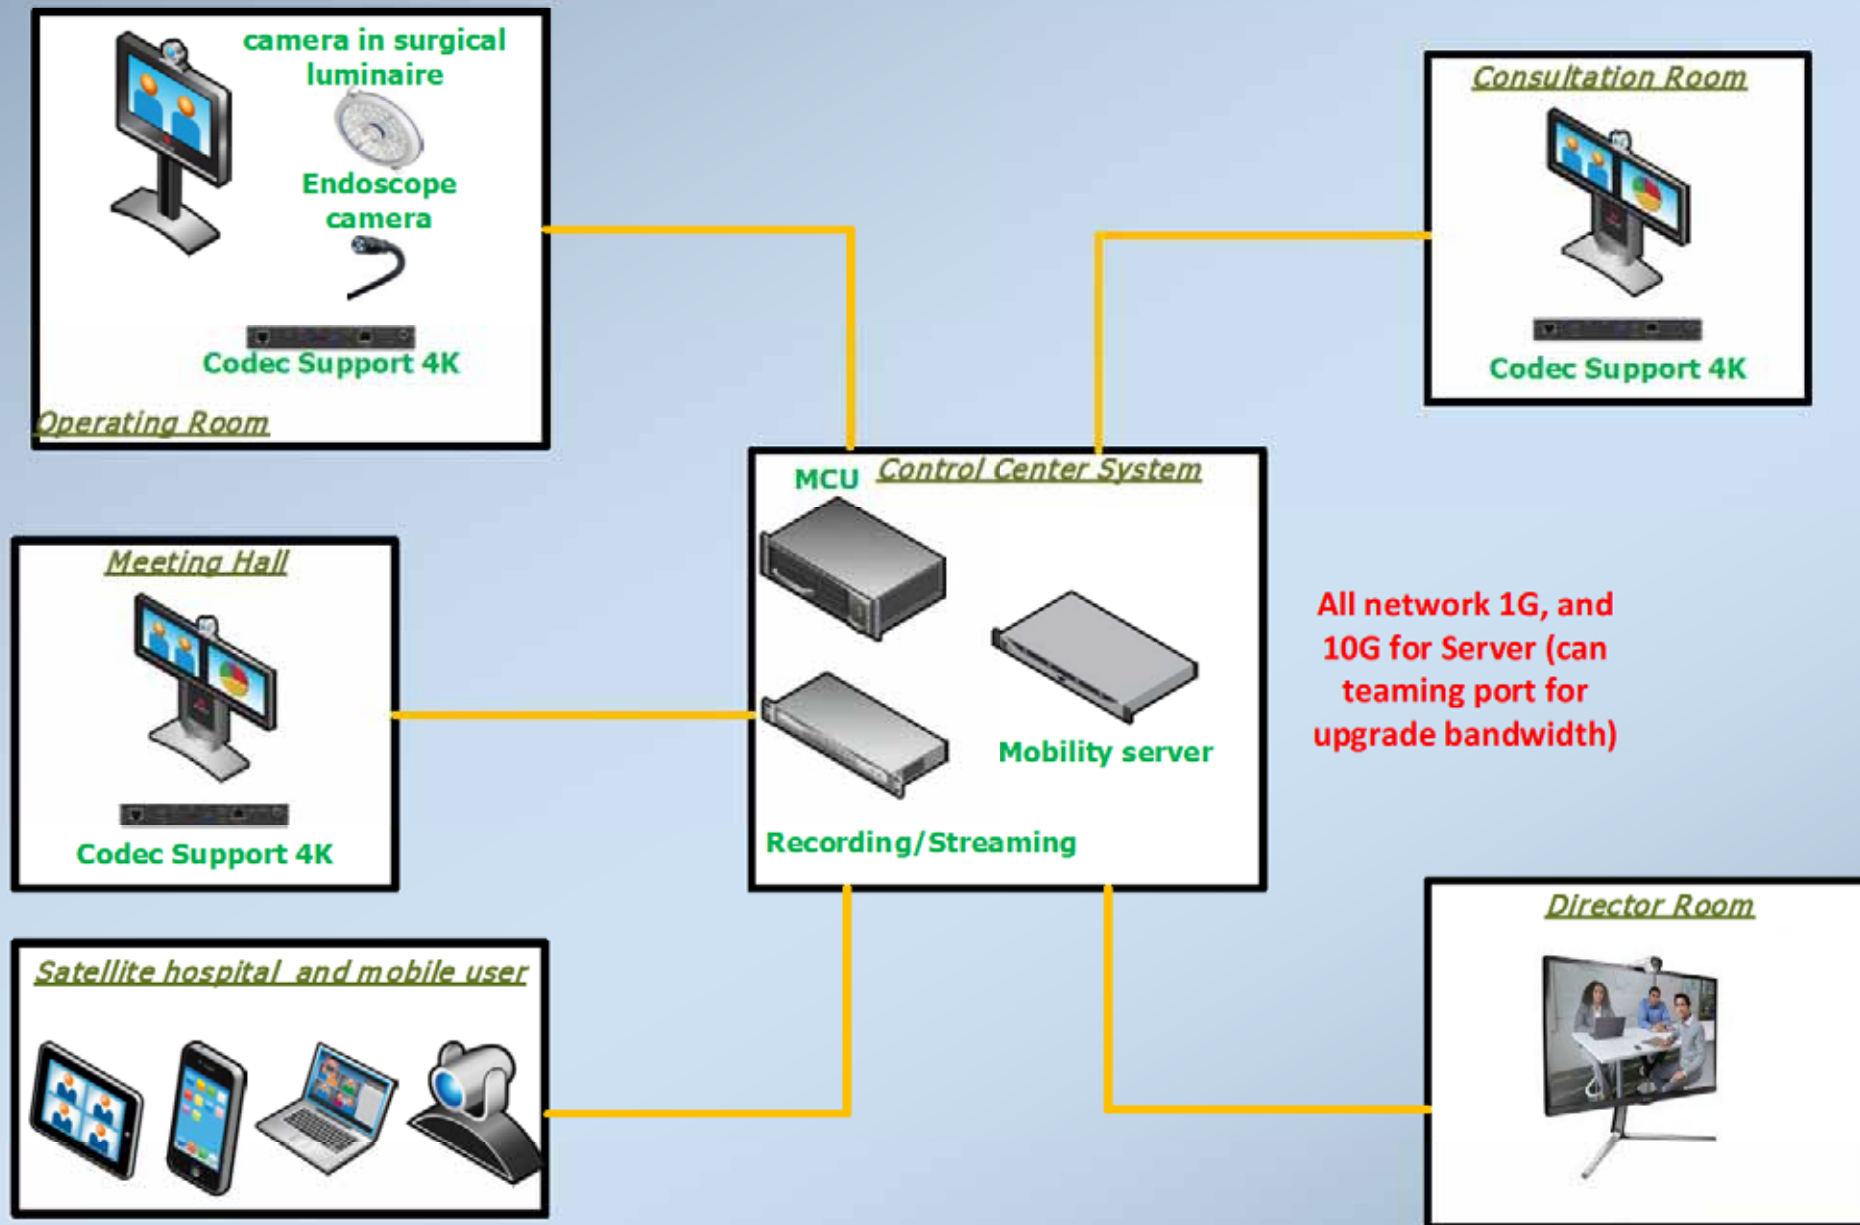

GET FASTER
INTERNET

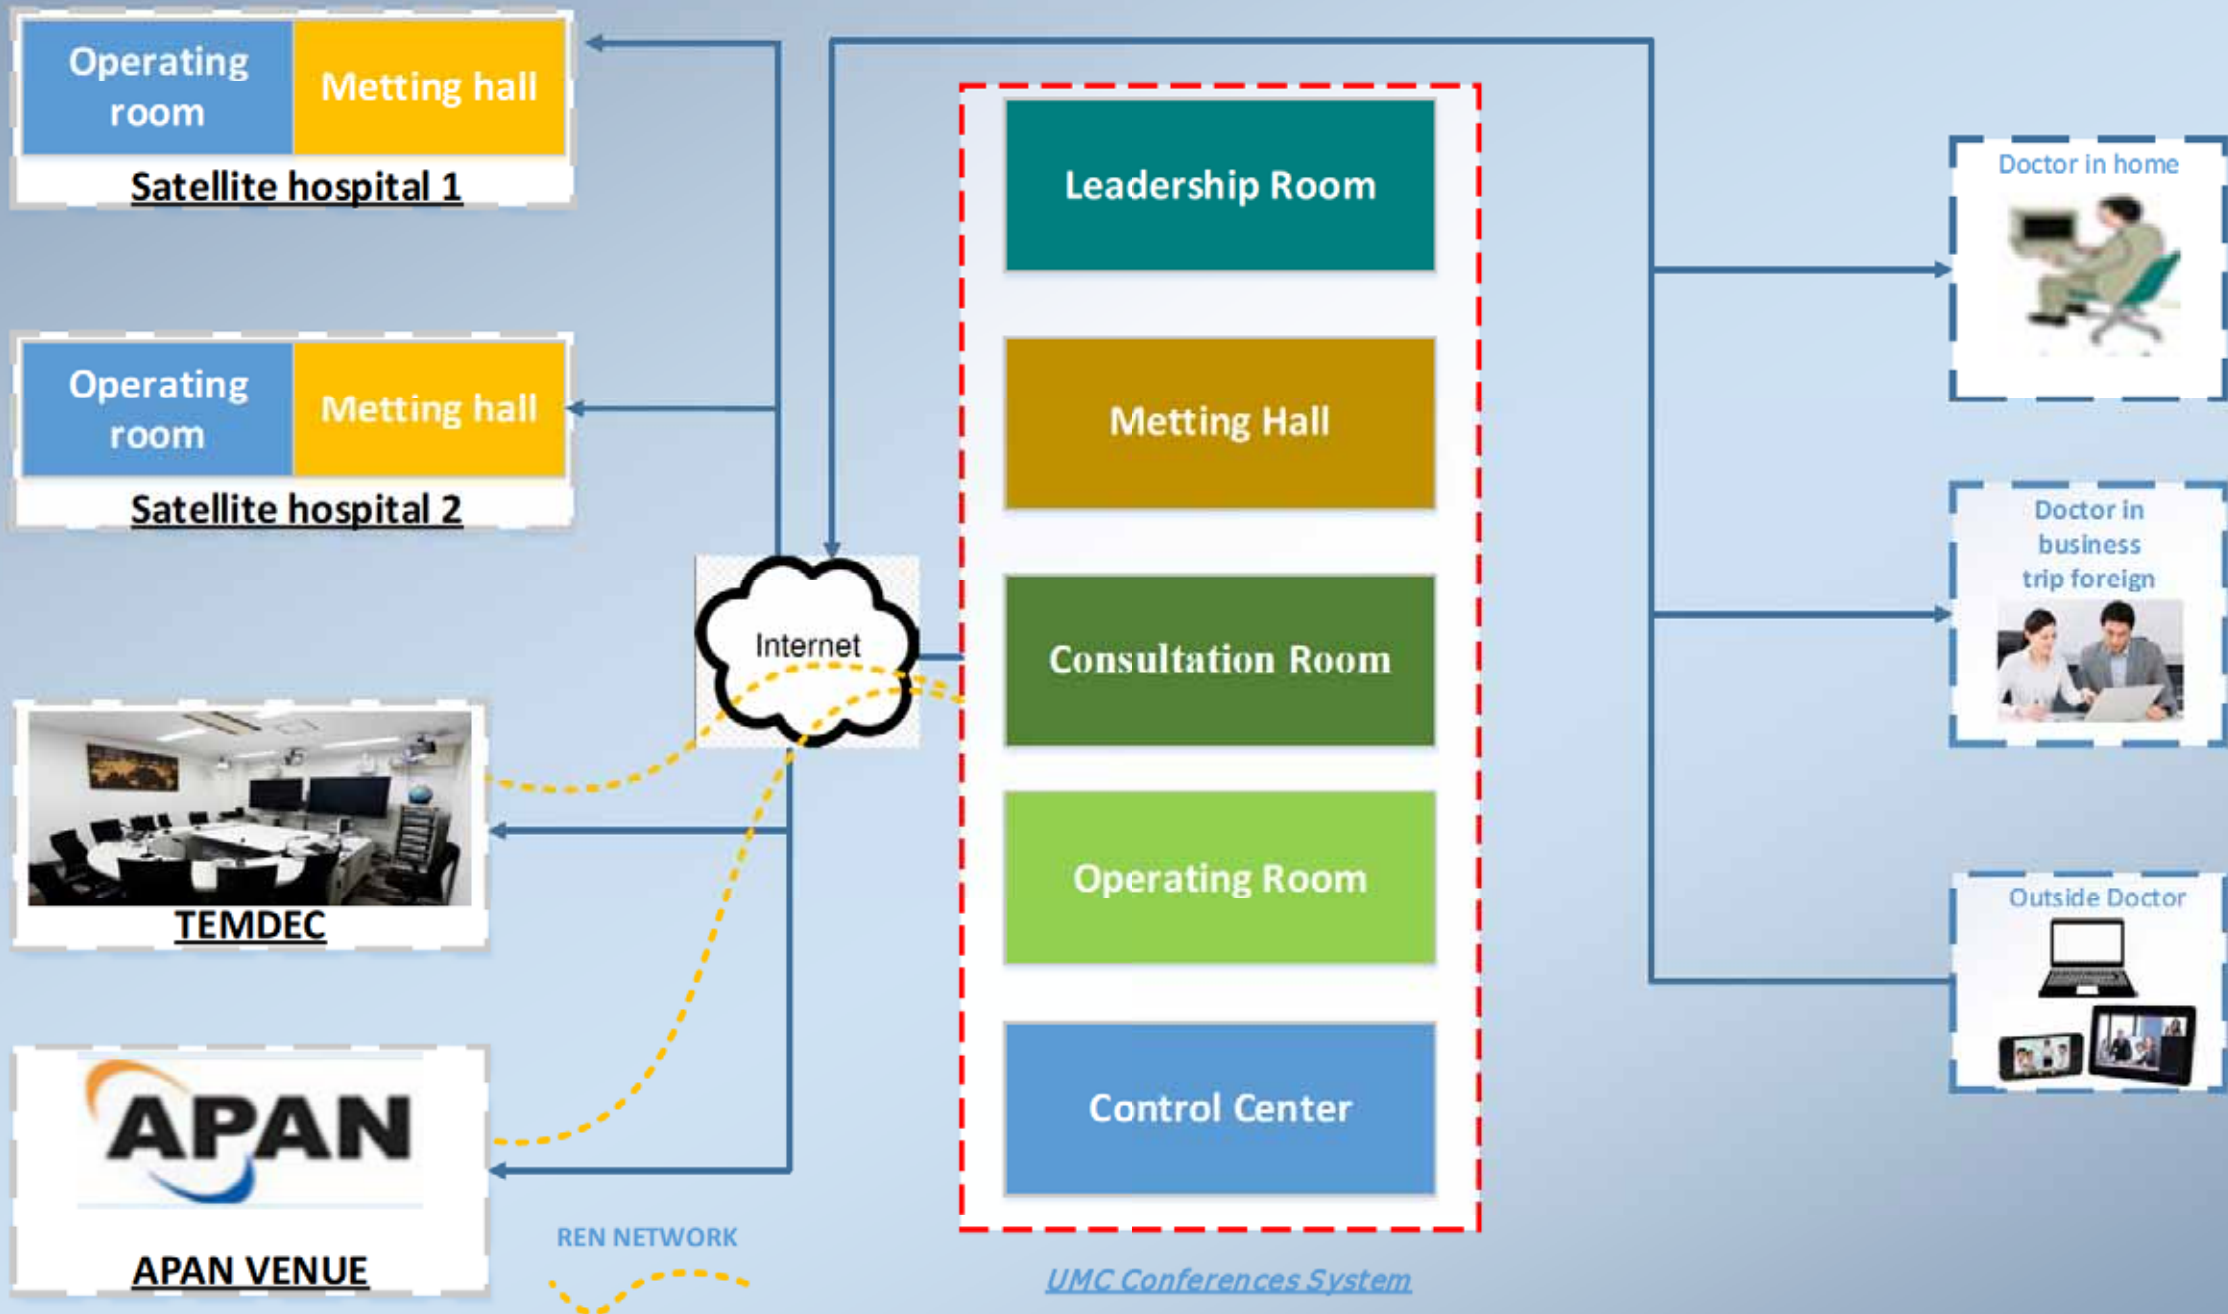

- Share the knowledge learned with my department and other staff interested about telemedicine system
- Upgrade bandwidth internet line to 500 mbps local and 20 mbps international. (Finish this month Sep-2017)
- Forwarding event information for faculties, departments related when received

Future plan
